

## You and us - together -

Dear Adlershofers,

Language connects! With this flyer we want to start a conversation with you and present our **ideas** and **visions** for **Adlershof**.

We SPD members experience our Adlershof every day - with open eyes and **close to the citizens**.

We are committed to a **common and tolerant togetherness**.

Together we will make **our Adlershof even more livable, future-oriented and sustainable**.

Best regards

*Your*  
*SPD Adlershof*

US!

**JOIN THE SPD NOW!**

A good life for all citizens in Berlin's smartest neighborhood is **a heartfelt matter to us!**

That is why we as **SPD Adlershof** are committed to

... and stand for our

**Adlershofer  
positions.**

## **Dörpfeldstraße, climate neutral**

### **»» DÖ – our Dörpfeldstraße**

Together, we are redesigning Dörpfeldstraße and the marketplace into our "Green Center". So that we all like to stay and meet there, like to shop and live there. The retail stores should become more varied and flourish. Together with the diverse stores, the civic associations, the Active Center and the Neighborhood Council, we are fighting for a livable Adlershof!

### **»» Urban planning and innovative mobility**

We mix traffic calming zones with extended public transport connections, expanded cycle paths and well-maintained roads. The mix is rounded off with car sharing and an optimized frequency, especially during rush hour. Rental bikes and a bicycle parking garage at the Adlershof S-Bahn station, as well as other ingredients, round out the course. The result is an attractive and equal coexistence in Adlershof.

### **»» Climate neutral without ifs and buts**

We are committed to climate protection! All our actions contribute to making Adlershof sustainable and climate neutral.

## **Quality of life and health**

### **»» Housing and the living environment**

We feel at home and secure in our own four walls and in the neighborhood. We support lifelong, affordable living in our beautiful Adlershof. We continue to make our district barrier-free. We advocate for more green in our immediate living environment - especially for a cooler Adlershof on hot summer days!

### **»» Family and spare time**

Our different types of families have similar wishes. Free daycare centers in Berlin are the result of SPD policy. We will continue to create more daycare places and would like to establish family service offices. So that you can "reconcile" family and career even better. We provide attractive playgrounds and better maintained green spaces, such as the Landschaftspark Johannisthal and Köllnische Heide. We also advocate for more pediatricians in Adlershof.

### **»» Health care and care for all**

Health is our most valuable asset! We must all have equal, fair access to all health services. That is what we are fighting for! Life-oriented counseling, information services and systematic inclusion strategies are important steps in this direction. Services for free physical activity are a further addition.

## **Equality and education**

### **»» Equal opportunities**

Self-determination through education for every person and at every age! We strengthen the Alte Schule as a place of lifelong learning and education. We want to continue and expand the successful Berlin model "Beratung Bildung & Beruf", also through additional educational services by district sponsors. We promote in-company and dual training.

### **»» Investing in our future**

Our schools are a central place for the personal development of our children. Together with the schools, we will develop and implement specific measures against bullying and xenophobia. In addition, we are expanding all-day care in schools. We are committed to digital learning and integrating successful forms of learning and learning concepts, as already implemented together with the Heide Elementary School.

### **»» Building bridges**

Our district administration must be accessible locally and also digitally without barriers. We fight for a citizen-oriented, efficient and attractive administration. Adlershof is a powerful location for science and research. We are all interested in the new developments there, which we would also like to use in Adlershof. Knowledge must be tangible and usable for everyone.
